this comprehensive volume explores the intricate mutually dependent relationship between science and exploration how each has repeatedly built on the discoveries of the other and in the process opened new frontiers a simple question which came first advances in navigation or successful voyages of discovery a complicated answer both and neither for more than four centuries scientists and explorers have worked together sometimes intentionally and sometimes not in an ongoing symbiotic partnership when early explorers brought back exotic flora and fauna from newly discovered lands scientists were able to challenge ancient authorities for the first time as a result scientists not only invented new navigational tools to encourage exploration but also created a new approach to studying nature in which observations were more important than reason and authority the story of the relationship between science and exploration analyzed here for the first time is nothing less than the history of modern science and the expanding human universe

this book takes a closer look at the relation between current issues and trends in higher education and scientific research in the arab world and in the gulf cooperation council gcc states of qatar and united arab emirates uae this thoroughly researched text traces the development of higher education in the gcc area as it continues to be positioned in an intersection of international and local factors the text further articulates the pivotal political and cultural influences that act as real and perceived barriers towards the advancement of key fields the chapters analyze the current policy trends structures and coping alternatives in addressing higher education challenges whilst also providing comparative first hand texts with the other arab states in the region by drawing focus on the gcc area the text identifies the crucial factors that hamper learning and research performance the book serves as an invaluable discussion on the implications for policy makers and heis in relation to the eponymous regions and other arab states in the gcc area enhancing understanding of the scope scale and complexity of higher education and scientific research in the gcc area the book will be of interest to academics researchers and post graduate students in the fields of educational policy comparative and international education and higher education

the official research journal of the society for scientific exploration provides a professional forum for presentation scrutiny and criticism of scientific research on topics outside the established disciplines of mainstream science a critical forum of rationality and observational evidence for the often strange claims at the fringes of science

a three volume encyclopedia containing more than 300 signed entries discoveries in modern science covers the most important discoveries in the fields of biology physics and astronomy intended to meet the needs of students and educators in high schools community colleges and four year colleges as well as the interested layperson it represents a wide range of disciplines biology medicine paleontology oceanography ecology geology linguistics volcanology meteorology and others entries rigorously and thoroughly present key scientific concepts in the context of accessible narratives and rich photojournalism the set presents an in depth treatment of curiosity led science as well as directed research that led to important inventions and technologies all entries provide cross references to related entries in the encyclopedia and a bibliography of resources either cited in the entry and or to aid in further research

the pressure to be seen to be making cuts across the public sector is threatening to undermine both the government's good record on investment in science and the economic recovery whilst the contribution of a strong domestic science base is widely acknowledged methodological problems with quantifying its precise value to the economy mean that it is in danger of losing out in whitehall negotiations scientists are under increasing pressure to demonstrate the impact of their work and there is concern that areas without immediate technology applications are being undervalued the committee believes the government faced a strategic choice invest in areas with the greatest potential to influence and improve other areas of spending or make cuts of little significance now but that will have a devastating effect upon british science and the economy in the years to come
